

Geography helps our children make sense of the world around them. In our school, we aim to give pupils the knowledge and skills to explore people, places, and environments—locally, nationally, and globally.

Through geography, children:

- **Discover places and cultures** – learning about their local area and contrasting regions around the world.
- **Understand natural and human processes** – from rivers and weather to settlements and trade.
- **Develop enquiry and fieldwork skills** – using maps, atlases, digital tools, and first-hand investigations.

We aim to nurture **curiosity, respect for diversity, and care for the environment**. Geography at our school not only builds knowledge but also inspires children to think critically about the world and their role in shaping a sustainable future.

Geography - Subject Overview 2025-2026						
	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Autumn 1	What is outside my window? (weather, maps, UK, settlements)	The UK and London	Mountains and Volcanoes	Earthquakes and Tsunamis	Rivers	Trade and Economics
Spring 1	What's in my Local Area? (Settlements)	Continents and Oceans Recap weather	Cities of the UK	Counties of the UK Comparison (similarities and differences) of Northumberland (recap) and a region of Europe (Italy)	Longitude, latitude and time zones	Counties of the UK Comparison (similarities and differences) of Northumberland (recap) and a region of Europe (Italy) and a region of North/South America.
Summer 1	UK Seaside	Australia - Non-European Study	Counties of the UK <i>Northumberland and Tyne and Wear</i>	Climate zones Recap the mountains (alps region)	Biomes and Climate zones	Climate zones Recap the mountains (Alps region) Climate change
